Commissioning principles: are they right?

Questions from a commissioner perspective

- Topic selection – step back?
- Scope creep – where is A&F best placed/received QA v QI v QC v QP?
- Providers of A&F priorities v end users of A&F priorities?
- What must we put into the specifications that we commission against?
- Personalisation of A&F – sports/apps/industry v4

- Wave across NHS focused on QI, not A&F
- Standards for publishing and communicating A&F data
- Frontline staff being involved in commissioning and design – embedding in clinical pathways?
- Less beautiful data more useful data – actions/QI/rate of change
- Celebrating success of A&F!!!!
